Foreword

Today, this book represents a backward glance over the experiences of a college year. Tomorrow, recollective thoughts must bring back these pleasant memories. To aid in the formation of these recollective thoughts, therein lies the purpose of this book.

Page Seven

If you can talk with crowds and keep your virtue, Or walk with Kings—nor lose the common touch, If neither foes nor loving friends can hurt you, If all men count with you, but none too much: If you can fill the unforgiving minute With sixty seconds' worth of distance run, Yours is the Earth and everything that's in it, And—which is more—you'll be a Man, my son! —Kipling. School Life The state of the later of the state of the s Page Fifteen Page Fourteen

The Mining Engineer

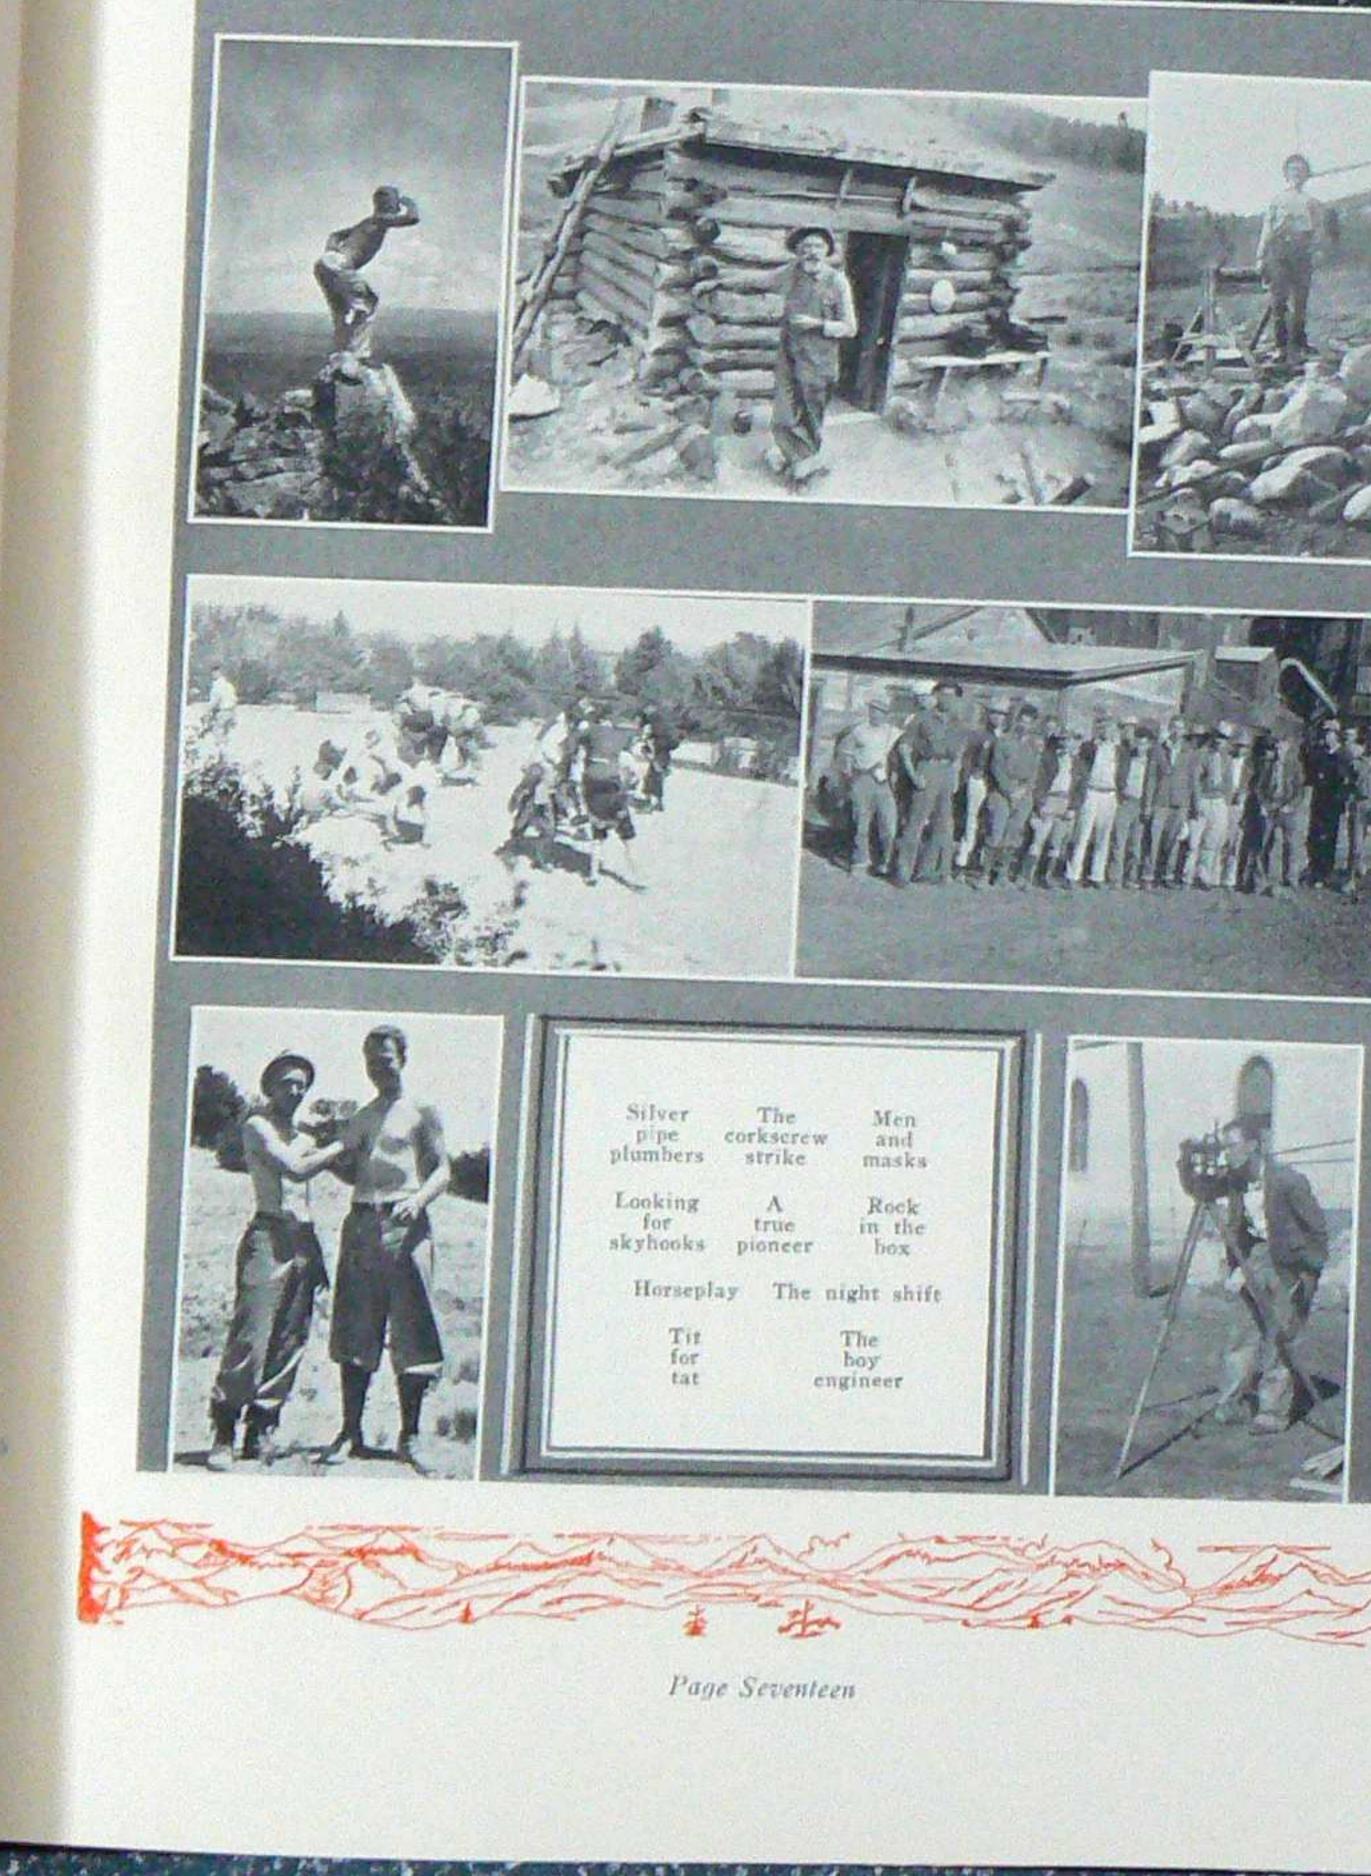

If you have been to any school or college
And possibly have got a sheepskin, too;
If you absorbed a fair amount of knowledge,
Or knowing not can look as if you do;
If you can run a survey like a "civil"
And analyze an ore by wet or dry;
If you can build with neither square nor level
And lay out towns with just the naked eye;

If you can wear your dress suit, sack or jumper
And look at ease in each one just the same;
If you can take the job of "supe" or pumper
Or any other man that quits the game;
If you can set a bone and tie up sinews,
Or later preach a sermon for the dead;
If you can talk like Webster, Clay or Depew
And turn a dinner table on its head;

And see its glorious future from the start;
If you can stick through troubles till the grand end
And never lose your patience nor your heart;
If you can run a buck-saw or a kingdom,
Or turn a petty monarch inside out;
If you are there to see the final thing done
That justifies the blows you dealt about;

If you can hold a board of cross directors
In happiness against their gauzy schemes;
If you can dodge the wrath of the electors
Till dividends will flow as in their dreams;
If you can make a mine pay from the grass roots
No matter what the time or place or year;
Then on my soul until the final blast shoots
We'll add the title, "Mining" when we call you
"ENGINEER."

-From the Pahasapa Quarterly.

The President's Message

According to evolution, human life is a development from the amoeba or some other minute one-celled form of life that inhabited the oceans hundreds of millions of years ago. The progress of earth life from the simplest forms to man, as recorded in the rocks, is one of the most fascinating of all histories. Geologists interpret this record as showing that life development, through the crustaceans, fishes, amphibians, reptiles, and mammals, with man as the crowning achievement, was due largely to physical revolutions of the earth, during which seas became dry lands, mountain ranges grew to lofty heights, and frigid climates descended into the temperate zones. The struggle for existence during these revolutions was so severe that many forms of life perished, but certain races not only adapted themselves to the environment, but in doing so, evolved into more advanced forms.

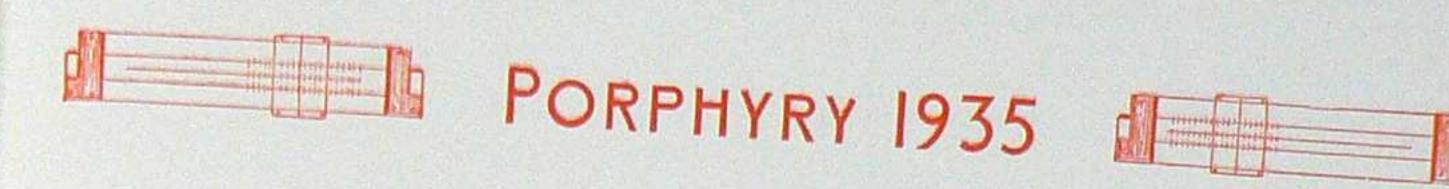

Civilization itself has been fostered by adversity. Had it not been for change in climates, making migrations necessary, and alternating seasons, requiring the growing and storing of provisions for the winter months, humans might still be making their homes in caves. Past history, both geologic and human, emphasizes that the best environment for progress is one that provides a proper balance between work and leisure; one that properly rewards honest effort while it penalizes indolence and excesses; and one that does not make life too secure. In the final analysis this is probably the environment that provides the greatest happiness for the greatest number.

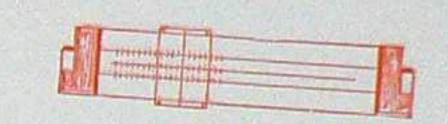

In attempting to solve the myriad ills of the present-day civilization, let us not lose sight of the lessons of the past or be too prone to discard the things that have been found to be worth while. If the future mining engineer, in the practice of his profession, does not profit by knowledge, ability, integrity, conscientiousness, restraint, and thriftiness, mankind will be going backward instead of forward.

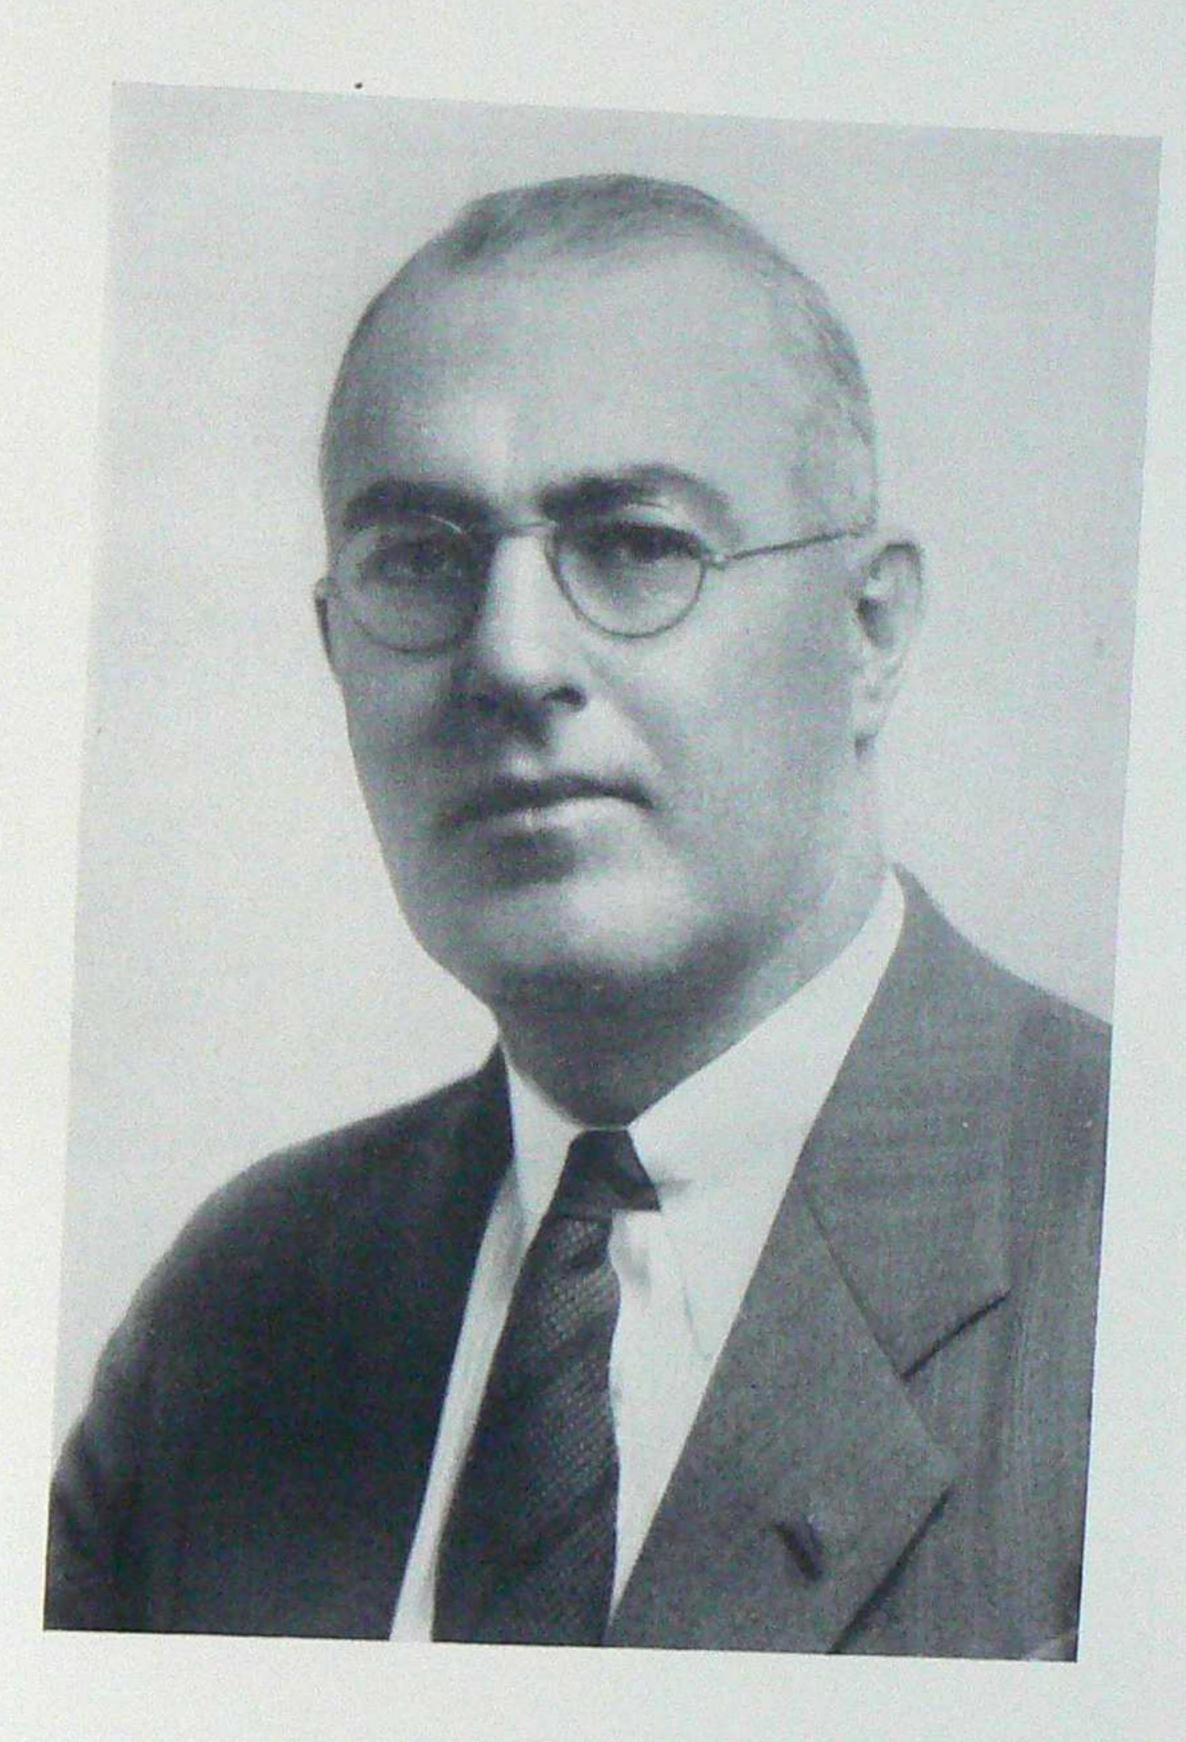

> E. H. WELLS, President.

The Athlete's Prayer

Dear Lord, in the battle that goes on through life,
I ask but a field that is fair,
A chance that is equal with all in the strife,
A courage to strive and to dare;
And if I should win, let it be by the code
With my faith and my honor held high;
And if I should lose, let me stand by the road,
And cheer as the winners go by.

And Lord, may my shouts be ungrudging and clear,

A tribute that comes from the heart,

And let me not cherish a snarl or a sneer

Or play any sniveling part;

Let me say: "There they ride, on whom are laure's bestowed,"

Since they played the game better than I."

Let me stand with a smile by the side of the road,

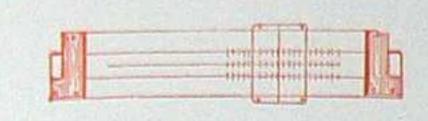

And cheer as the winners go by.

So grant me to conquer, if conquer I can,
By proving my worth in the fray,
But teach me to lose like a regular man,
And not like a craven, I pray;
Let me take off my hat to the warriors who strode
To victory splendid and high,
Yea, teach me to stand by the side of the road
And cheer as the winners go by.

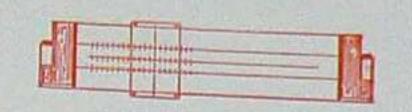

-Selected.

PORPHYRY 1935

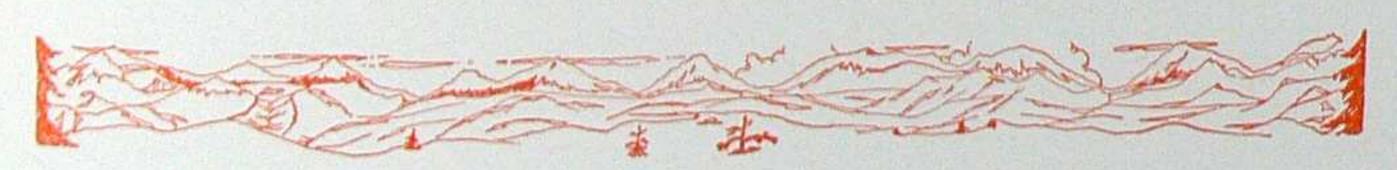

Coach L. C. Butler

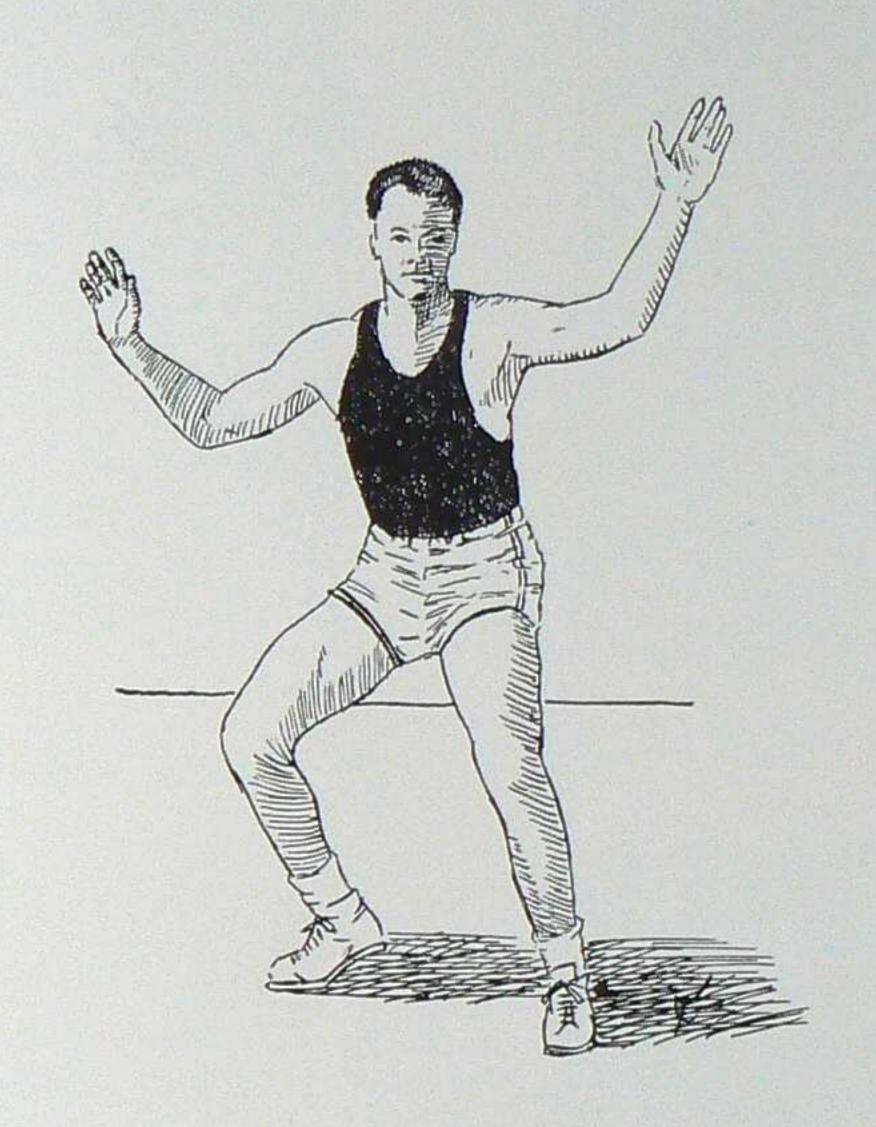

Coach Butler, after his graduation from Colorado State Teachers College, was retained on the coaching staff at that school until coming here as Director of Athletics this fall.

He participated in football, basketball, baseball, tennis and track during his college career.

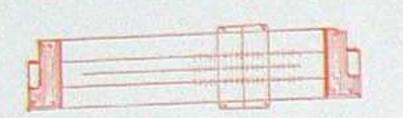

We sincerely hope he will be with us in future years to complete the work he has so successfully started.

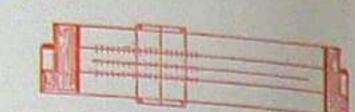

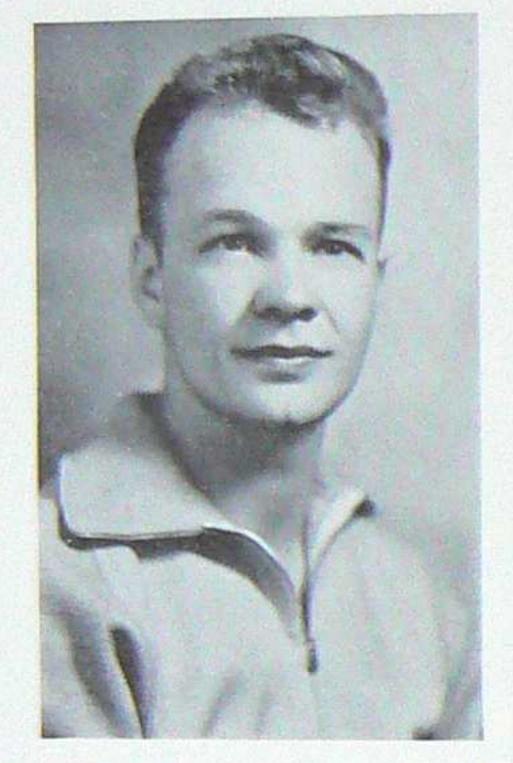

Page Sixty-three

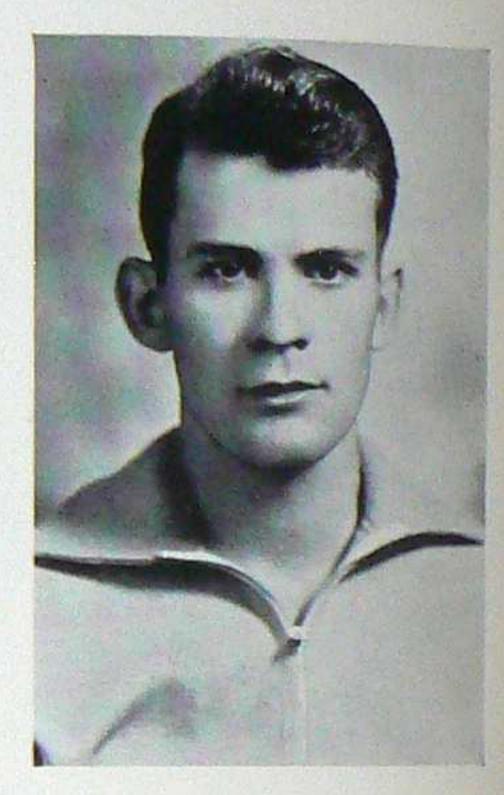

Basketball

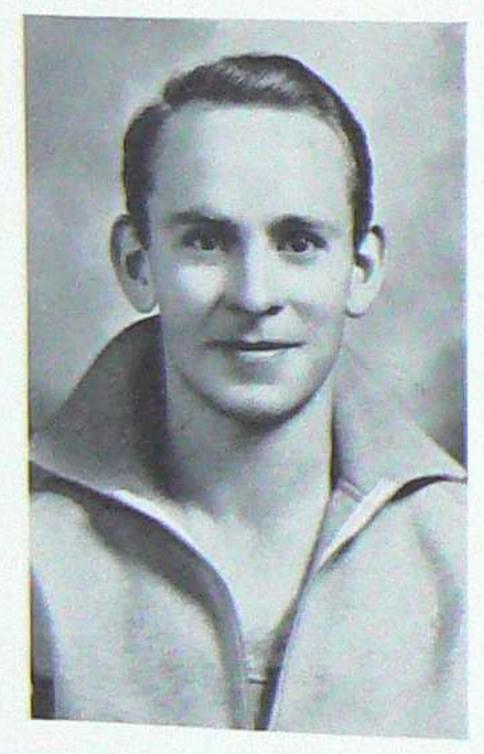

Cy. Boding - - Captain, Guard Much of the team's success is due to Cy's ability as a defensive man and his coolness under fire.

BOB PYLE - - - Center Bob is a good ball hustler with lots of drive. He was third highest scorer in the Conference, although missing two games

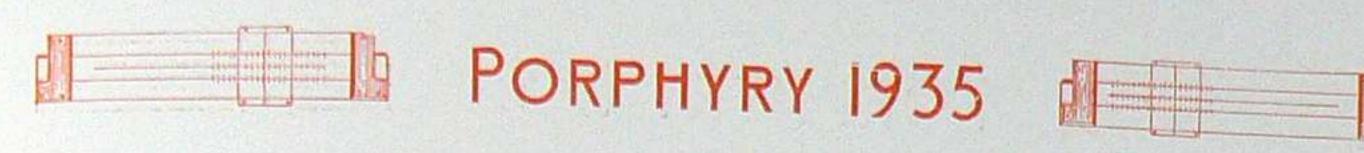

RALPH SEIDEMAN - - Guard Outside of being fast and with lots of energy. Ralph was always pepping the boys up with his line of chatter.

Tennis Team

Savile, Rackmil, Wertz, Head.

This year's tennis team is composed mainly of veterans from last year.

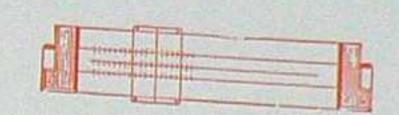

During the spring season of 1934 the team had fair success in their intercollegiate matches. The fall season was limited to three matches, two with the Albuquerque Tennis Club and one with the University.

The tentative spring schedule for this year calls for a Conference tournament to be played at Roswell. Other collegiate matches for the season have been arranged with the University and the Aggies.

Baseball Team

Top row: Kettel, Lind, Salzmann, Head, Boding, Rackmil. Bottom row: Garrett, Duffy, Martin, Fuhrman.

At the time of this article the baseball season was just getting underway.

None of the schools in the district have regular teams and inter-collegiate contests can not be arranged. Baseball is not classed as a major sport and no letters are awarded to players.

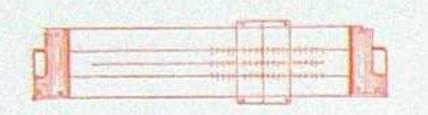

Games of the past have been played with independent teams such as Gallup American Coal Miners, Terrero Metal Miners, State Penitentiary, Ft. Bliss, and local teams.

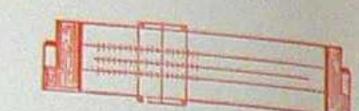

This year's team will be composed chiefly of regulars from last year. Only two members of last year's team are missing and they can be easily replaced by freshmen or transfers.

Student Council

President -			-	Thornton C. Bunch		
Vice-President	-		-		Meyer Dubrow	
Secretary-Treasu	irer	_	-	_	Paul Case, Jr.	

The Student Council is a branch of the Athletic Association and has supervision of all student govern-ment, all student publications, and all student activities other than those controlled by the Athletic Com-

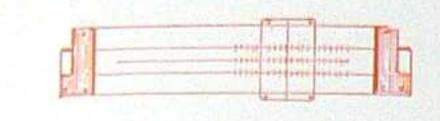

THORNTON C. BUNCH

The members of the Council consist of the Student Body President, who automatically becomes the Council President; the Vice-President and Secretary and Treasurer of the student body holding similar offices on the Council; the Senior Class is represented by four members; the Juniors have three representatives; the Sophomores two and the Freshmen one representative.

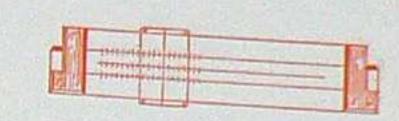

Quick action and fair judgment are the keynotes of the Student Council's activities. The Council has decided several major issues this year and has enjoyed the full account to the full a joyed the full cooperation of the student body.

PORPHYRY 1935

The Vigilantes

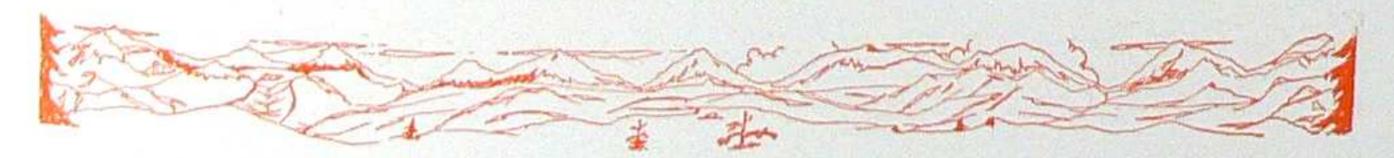

Martin, Jordan, Aresco, Anker, Bubenzer.

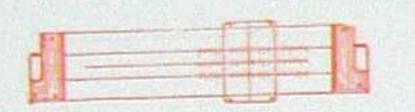

To instil in a freshman mind the traditions of our school, is the purpose of the Vigilantes. High school "heroes" must be "toned down"—the meek must be taught to stick-up for their rights. It is well that they be taught at an early date that MINERS don't recognize the word defeat or quit.

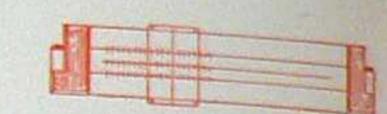

Upon enrolling at the School of Mines we designate our future, and we must come through. This type of profession has no place for weaklings—a strong heart and a stiff backbone are the prerequisites. It is the duty of the Vigilantes to weed out the men who can't carry on the traditions and spirit of the school.

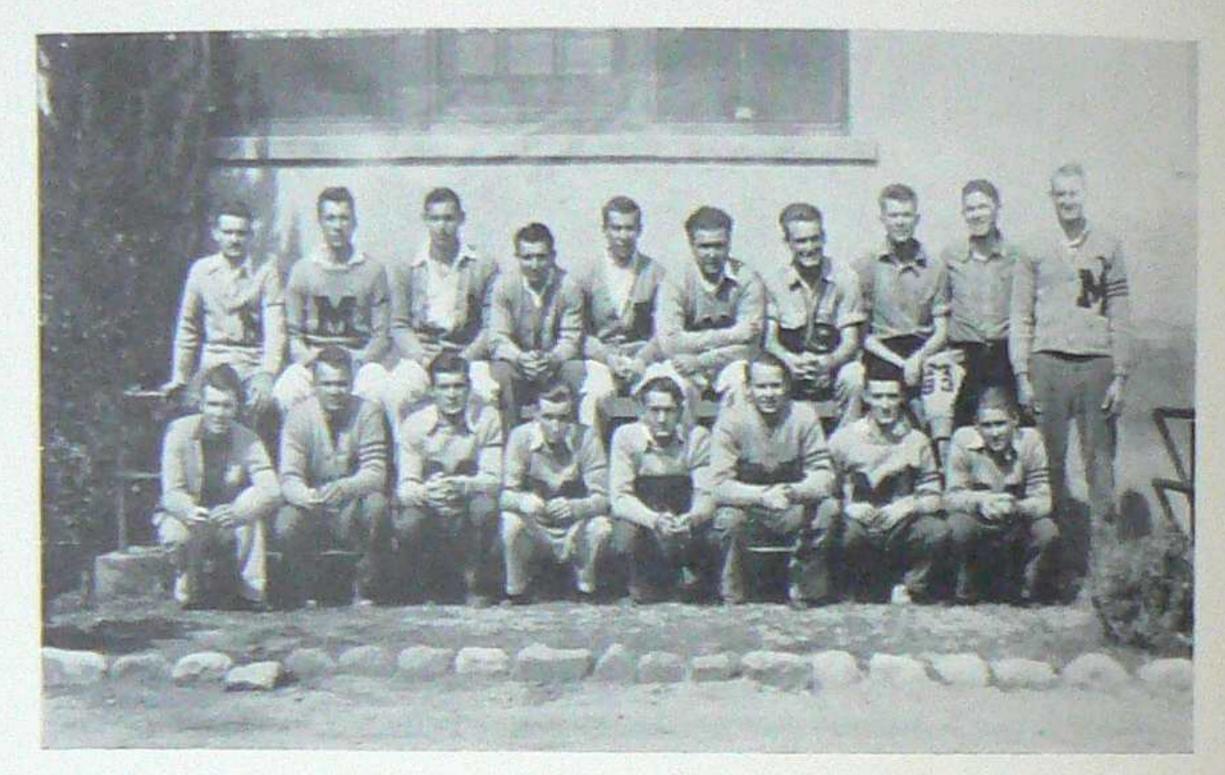

The regulations usually enforced by the Vigilantes underwent a radical change this year. We, the "grads", hope the change was for the best. We have but to look to the mining camps of the world to find MEN who have taken the initiation and are proud of the fact.

CY BODING

The M-Club

President - - - - Cy Boding

Only men who have been awarded the Varsity "M" for competition in inter-collegiate sports are eligible for membership in the "M" Club. The membership is, therefore, necessarily limited. But let it

be said that these men are "tried and true" miners, and that the "M" Club is a very live organization.

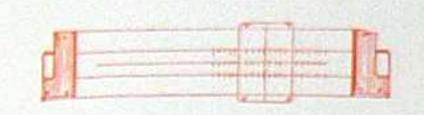

Under the direction of President Cy Boding and Coach Pete Butler the "M" Club has been completely reorganized and bids to be far stronger than ever before

The "Smoker" given by the Club was a very enjoyable affair. Members of this year's crack basketball team were awarded sweaters at the close of the entertainment.

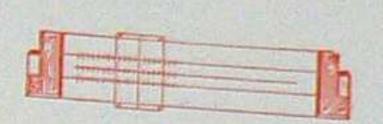

The Club will lose quite a few members this year thru graduation, so it's up to you new members to put your shoulders to the wheel and carry on.

The Athletic Association

President -		-	Th	ornton C. Bunch
Vice-President		-		Meyer Dubrow
Secretary-Treasu	irer		-	Paul Case, Jr.

The Athletic Association of the School of Mines includes all registered students of the institution.

The Association consists of two divisions: the Student Council and the Athletic Committee. The Student Council controls all student government and stu-

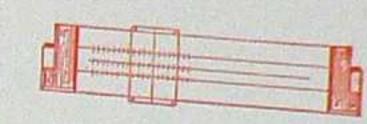

dent publications. The Athletic Committee is composed of five members: the athletic director, two other faculty members, the secretary-treasurer of the Athletic Association and one member at large from the student body. The Committee has control and disposition of the funds of the Association. The Committee is also empowered to award varsity letters, certificates, medals and sweaters to deserving athletes.

The officers of the Athletic Association include a president, a vice-president and a secretary-treasurer. Election of officers takes place at the spring meeting of the Association.

Page Seventy-eight

The Entertainment Committee

Chairman - - - John A. Salzmann

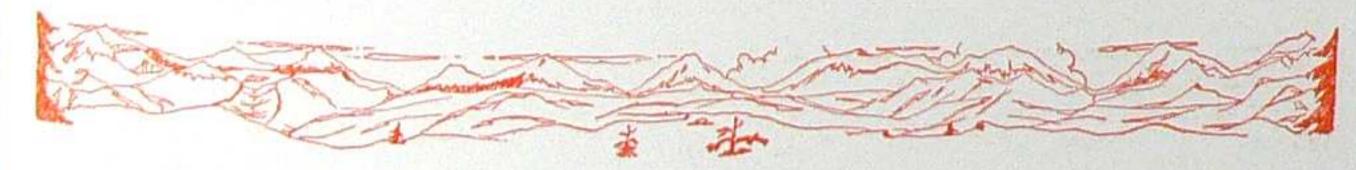

The Entertainment Committee is certainly one of the important committees on the campus. This committee dishes out the "brighter side" of college life.

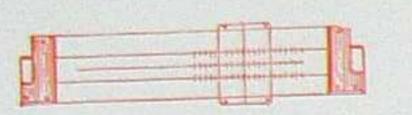

JOHN A. SALZMANN

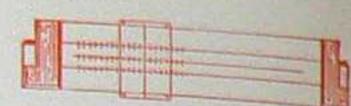

At the beginning of the school year the Committee decided to offer the students as diversified a program of entertainment as possible. And let it be said at this time that these men lived up to their decision. Dances, free motion picture shows, teas and parties have all helped to make this one of the happiest of our college years.

Everything the Committee attempted was highly successful and we extend to them our heartiest thanks for their efforts. We are especially grateful to John A. Salzmann for his work as chairman; faced with a real problem, he handled it will handled it with commendable judgment.

Alumni Association

of the

New Mexico School of Mines

OFFICERS FOR 1935

President - - - - Harold Olsen, '29, Socorro, New Mexico
Vice-President - - Truman G. Spannagel '30, Socorro, New Mexico
Secretary-Treasurer - - G. Townsend Harley '33, Socorro, New Mexico
Mem. Exec. Comm. - Charles F. Williams '21, Federal Bldg., Miami, Okla.
Mem. Exec. Comm. - Eugene C. Anderson '17, Terrero, New Mexico

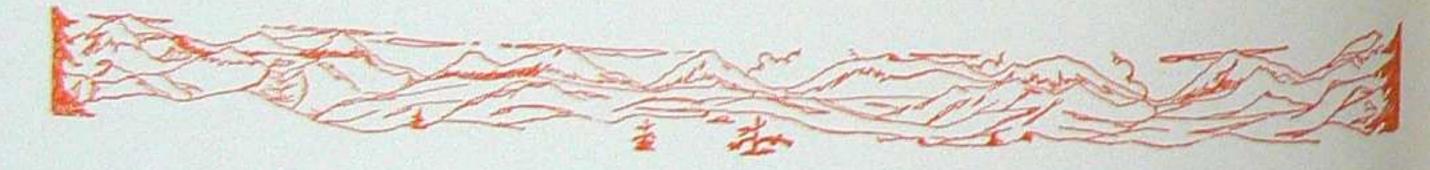

The Alumni Association of the New Mexico School of Mines was revived at an informal meeting held after the 49'ers dance in November, 1934. The first regular meeting was called to order on Sunday, March 17th, following the St. Pats celebration of this year. At this meeting the officers for the year 1935 were elected, and an executive committee of five members was formed.

There were thirty members in attendance at the St. Pats meeting. Every member of the present Senior Class of the School of Mines has joined the Alumni Association, and it is anticipated that in the future, each senior class will join the association in a body prior to graduation.

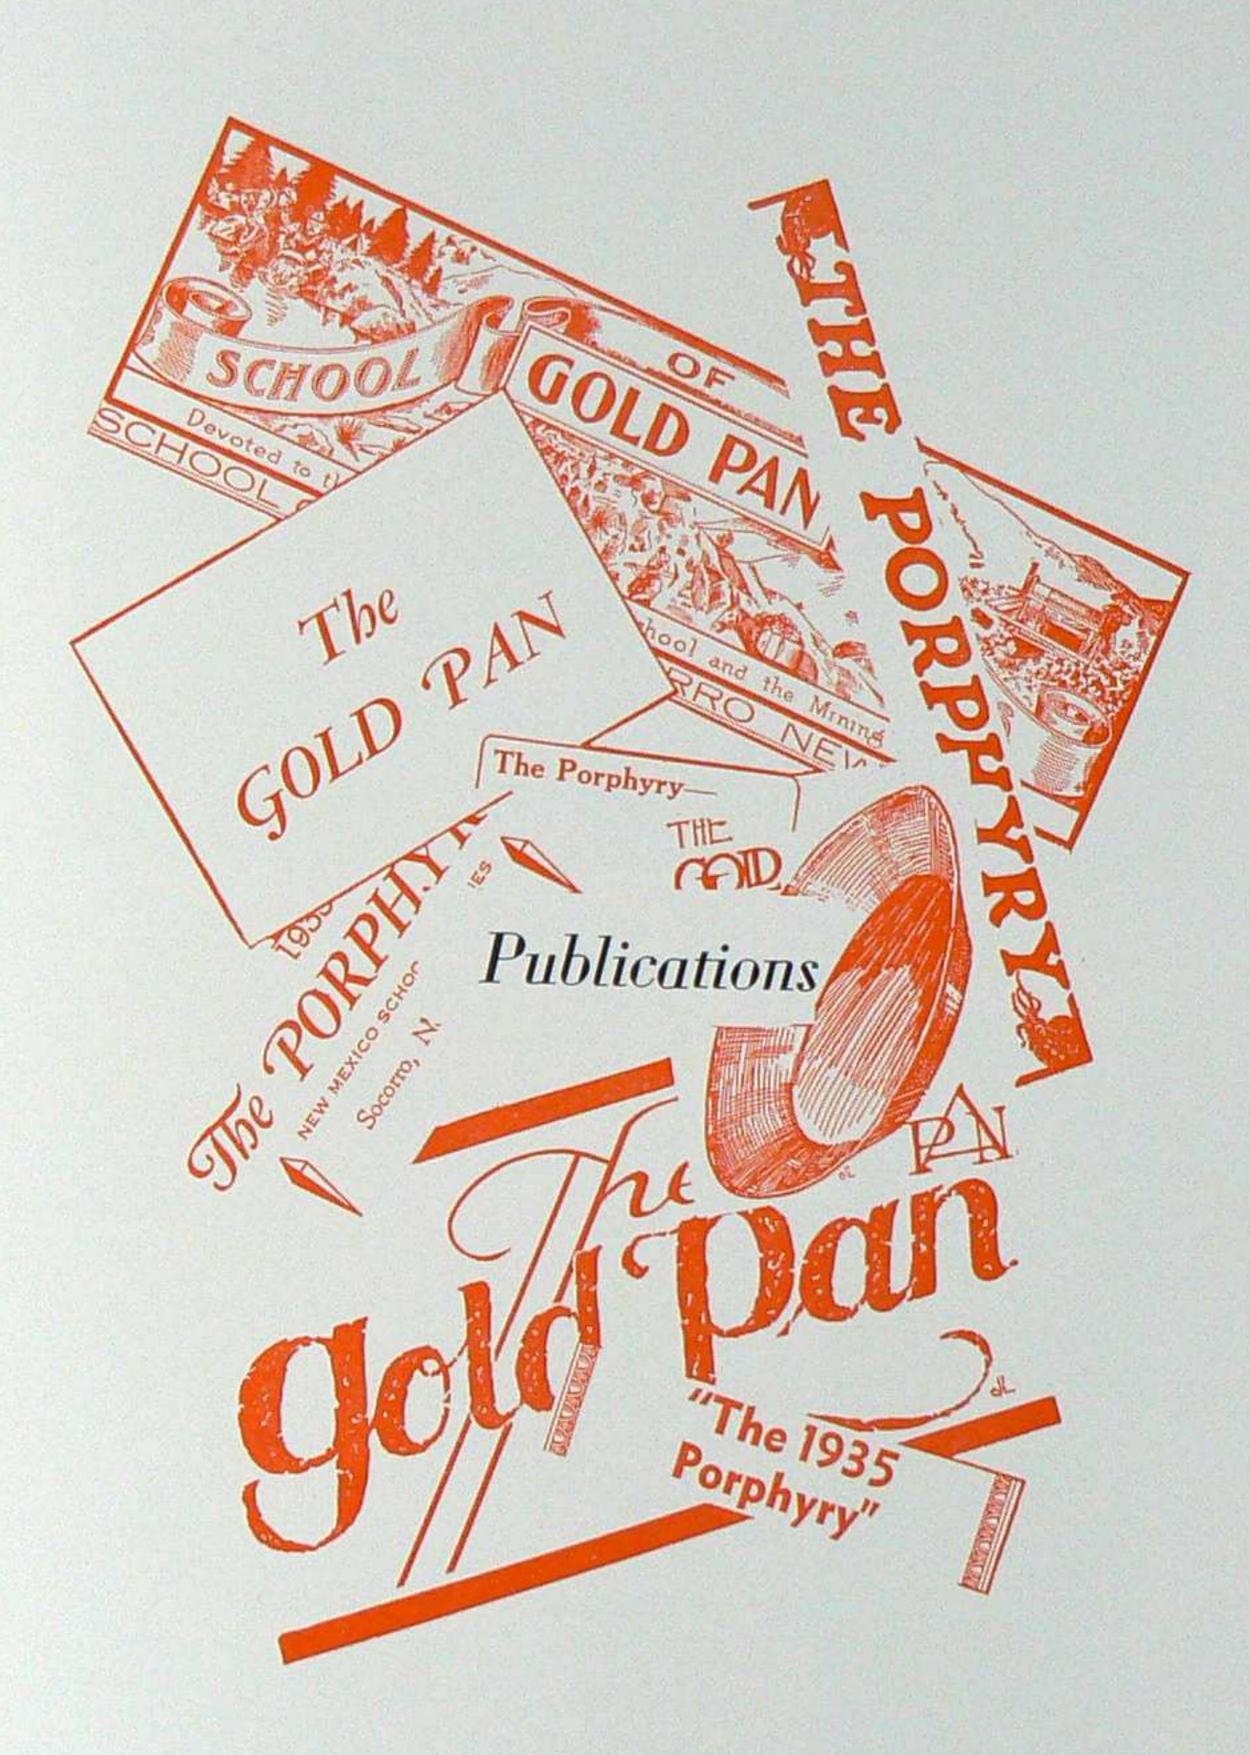

During the next few weeks the executive committee will be engaged in the task of revising the constitution and by-laws for presentation to the members for their approval. A reserve fund has been created, the earnings from which will eventually provide a scholarship or loan fund for deserving students, or will be for use in other ways for the benefit of the school.

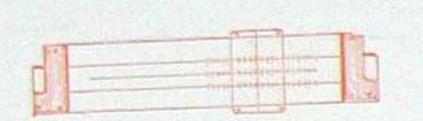

It is the aim of the executive committee to make the association of definite practical value to its members and to the school. With this in mind it has designated the school publication, The Gold Pan, as the official publication of the association, and will endeavor to secure monthly articles of interest from its members for publication therein. An Alumni News Column will also be included, and as rapidly as possible, the association will endeavor to act as a clearing house for those who need jobs, and for those who have jobs to offer.

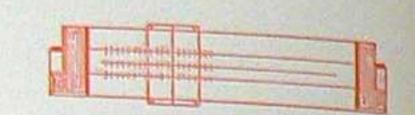

Come on-Let's put the ALUMNI ASSOCIATION ACROSS.

The 1935 Porphyry

Editor - - - Thornton C. Bunch Business Manager - - Joel M. Suchman

Someone wrote, "A man must progress, or fall back; there is no standing still." We have tried to apply this principle to the 1935 Porphyry.

Because the curriculum of this school deals with metals in one manner or another, it is altogether fitting that we should adopt a metal cover and metal insert sheets. For the same reason the theme of the book is Mining, Metallurgy and Geology.

The gathering of material and pictures has required considerable time and effort, and would have been impossible without the splendid cooperation of

The Gold Pan

Editor - - - Andrew L. Wiegand Business Manager - - - Cyril J. Boding

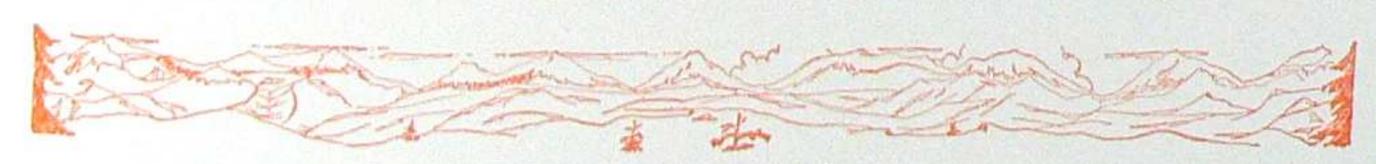

The Gold Pan has completed its eighteenth year as the official student body periodical. The fundamental purpose of the paper is to foster the develop-ment of the school and the mining industry. It also serves as a medium of entertainment, and as a reminder of the many incidents that make up the daily life of the students.

For the last two years the Gold Pan has been under the able supervision of Andy Wiegand. During this time considerable progress has been made, both in general make-up and details of the paper.

The student body appreciates and commends the effort extended by the editor and his staff to make the paper more interesting and entertaining for its readers.

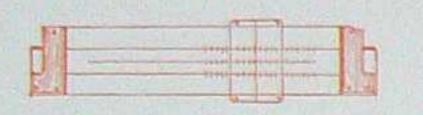

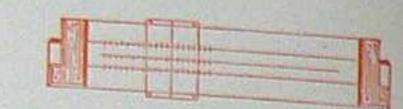

Page Eighty-five

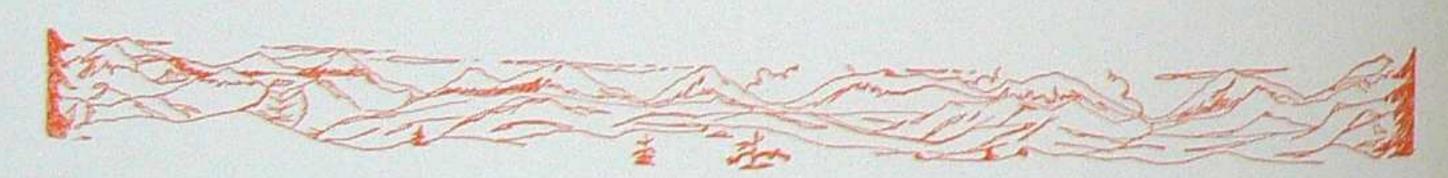

I am four monkeys. One hangs from a limb, Tail-wise, Chattering at the earth; Another is cramming his belly with cocoanut; The third is up in the top branches, Quizzing the sky; And the fourth-He's chasing another monkey . . . How many monkeys are you? -Alfred Kreymborg.

The Opening Dance

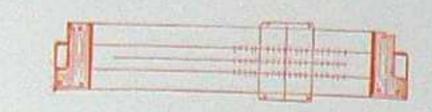

The social season of 1934-1935 officially commenced on September 26th when the school gave a dance in honor of the Freshman Class. Everyone looked forward to the dance as a means of getting acquainted with the new students. The damsels of the fair city were greatly enthused as the freshmen were introduced, for this facilitated their prospects of being rushed for the next nine months.

The dance started at nine o'clock with the orchestra playing snappy tunes. During intermission the freshmen staged their little antics and the crowd applauded them for their efforts.

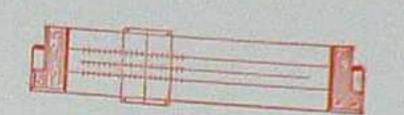

At midnight the music ceased and the jovial crowd disbanded, leaving the gymnasium in darkness. The dance for some may have been just another good time, but to most of us it meant the forming of friendships.

Page Eighty-eight

PORPHYRY 1935

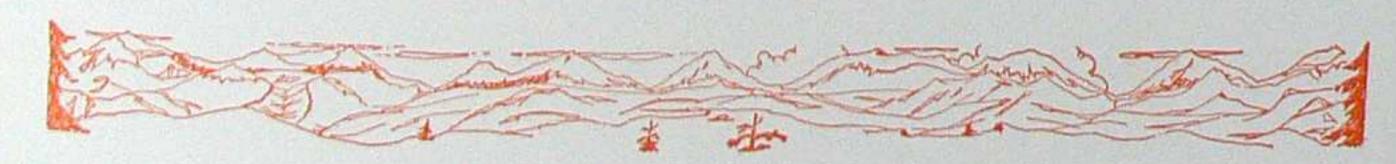

Forty Niners Dance

On November 10th, 1934, the stage coach was due at the peaceful old town of Socorro, bringing fair maidens from the far reaches of the country. The coach was sighted in the near distance. The people did not surmise that "Dead Eye Dick" and his "mal hombres" were lurking in the shadows of the saloon. Suddenly, like a thunderbolt from the sky, shots rang out from their trusty sixshooters and the rip snortin', rootin' tootin' "banditos" had attacked and plundered the stage coach, taking the damsels and hanging Dan McGrew. It was a bloody sight, folks. Yes, sir!

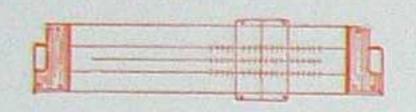

To the rescue came the hard fighting cow punchers, but it was too late, the stage coach was plundered and Dan was hung.

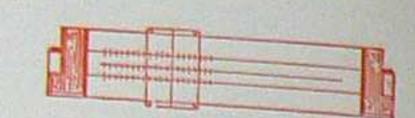

The townspeople stormed the Black Boot saloon to celebrate the arrival of the coach which marked the beginning of the Forty Niners dance.

Drinks were served to quench the dry throats of the hearty prospectors. Miners drank cider to the tune of "Sweet Adeline." Everyone was happy although some were just mellow. There was gambling of all kinds, such as black jack, craps, chuck-o-luck, poker, and roulette. Even the face on the barroom floor was there, in fact some said they saw several faces on the floor. The music swelled in rhythmic fashion while the old timers did square dances and the Virginia Reel. Everyone seemed to be milling well. Good times like these often make us wish that the good old days were here again,

Page Eighty-nine

New Year's Dance

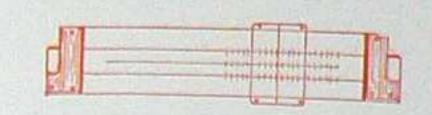

The student body and friends of the New Mexico School of Mines were invited to attend the last social function of the year 1934. The dance was held in the clubroom and the music was furnished by the school orchestra. Dancing commenced at nine o'clock with the crowd arriving in good spirit to celebrate the ushering out of the old year and the arrival of the new. The students, faculty members, and townspeople rejoiced in a true holiday spirit. At twelve o'clock the noise reached its climax and gradually declined as the hilarious crowd wished each other a happy new year. It was a dance that will long be remembered.

St. Pat's Dance

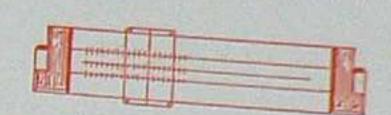

They say that in the spring a young man's fancy turns toward love; this could easily be verified by the vigor and vim with which the freshmen worked to decorate the gymnasium. Little did they realize that on the afternoon of March 17th they would be made to perform their amusing capers while their dates looked on in glee, nor that they would kiss the sacred Blarney Stone, and be reminded that they were taking their first ordeal in becoming an engineer. The gymnasium was beautifully decorated in green and white with fantastic designs.

Page Ninety

PORPHYRY 1935

The people crowded to observe the dignified seniors accept their St. Pat's diplomas. This marked the beginning of the finale of the college career of the class of '35.

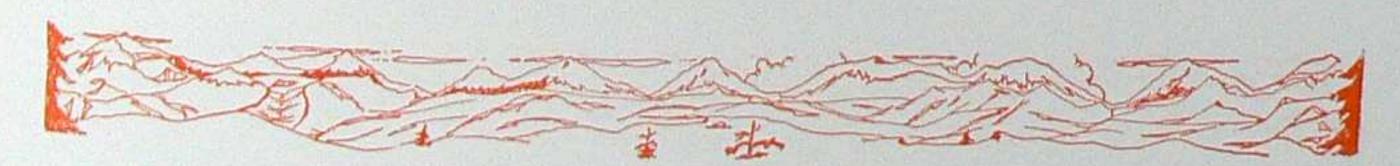

At night the grand ball was held with merry couples dancing far into the morning under the brilliant New Mexico moonlight. As Home Sweet Home was being played there seemed to be a warm glow in the hearts of all that were present, and thus passed another St. Pat's into the annals of the history of the school.

Commencement Dance

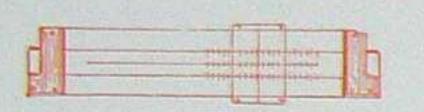

Commencement dance was the grand finale of our social season for the year 1934-35. Marking as it did the last social appearance of the seniors, it was naturally the most impressive dance of the year.

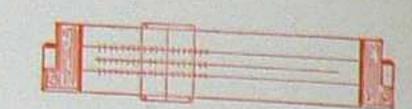

To the underclassmen it meant no more than the usual formalities, attending the graduation of another class, but to the seniors it was different. A certain sadness lurked in their eyes as they thought of the happy hours spent with books and friends, but beneath all this was happiness that comes with true accomplishment, and a realization that the degree was worth its cost, regardless.

The dance is over...and a dream of new worlds to conquer...new friends to make....the old order changes. It is time to say "Adios Amigos."

MASTERS OF THEIR CRAFT

The most famous sword maker of the 16th century was Andrew Ferara, an Italian. Hammering every part of the blade from steel of his own manufacture ... his swords exist today as masterpieces of his art.

When a man makes a product of the finest quality, it is with pardonable pride that he places his name upon it. The maker's imprint, accompanied by traditions of skill and high standards of honest dealings, becomes

the customer's guarantee of highest quality and satisfaction.

Emulating the old masters of sword making, Southwestern craftsmen put their finest work into every engraving bearing the SWECO imprint. It is your guarantee of painstaking care ... of a superior printing plate.

We are proud to proclaim that the engravings in this volume were made by Southwestern craftsmen.
