Emergency Procurement Determination

TO: Delilah Walsh, Vice President of Administration and Finance 

FROM: Lisa Majkowski, Interim Director of Purchasing 

DATE: 06/27/2025

RE: **Emergency Procurement – Technology Services and Equipment**

This memo serves as the official determination that an emergency condition exists as defined under the New Mexico State Procurement Code, specifically NMSA 1978, Section 13-1-127 (a), which allows for emergency procurement without the use of competitive sealed bids or proposals when there exists a threat to public health, welfare, safety, or property caused by a flood, fire, epidemic, riot, act of terrorism, equipment failure or similar event to take immediate action.

Nature of Emergency:

Technology legal services, technical services, and equipment for the disruption of services and technology needs.

Justification:

The nature of this situation makes competitive bidding impracticable. The conditions meet the definition of an emergency under the Procurement Code, and this procurement is made in compliance with Section 13-1-127 NMSA 1978 (a)
